FIRST WEST

October 2023

Hello Everyone,

We said goodbye to summer at The End of Summer Party and we would like to thank everyone for attending. We had a great time. Thank you to all who donated and to the volunteers for their help in making this event a great success.

As we move forward there will be much information provided for the upcoming Medicare Open Enrollment. We know this can be very confusing and want to help you make an informed choice. Please take this time to learn about all of your options so you can make the decision that is **best for you**. You will be able to setup private counseling sessions so please take advantage of this opportunity. You do not need to make a decision until December.

Special events for this month include the Fall Festival and the Halloween Party. We are working to keep you well-informed and healthy while having a great time with friends.

We ask you to continue to use our fall/winter protocol. Please wash you hands frequently or use the hand sanitizer placed in various locations in the hall. Try to limit the hugging and most importantly, if you aren't feeling well please stay home and recover quickly. We don't want anyone missing out on all the fun we will be having. Everyone is doing a great job...let's keep up the good work.

We look forward to all of the informative and exciting events scheduled for October and will continue to the end of the year with additional parties and educational seminars. See you soon!

Myths & Facts About Hospice

Choosing hospice care can be a difficult decision for patients and their families and there are a lot of misconceptions about the service. As a result, many who need quality pain and symptom control, along with social and emotional care, do not take advantage of hospice. **Here are some myths and facts to consider when thinking about using hospice:**

Myth: Hospice is a place.

Fact: Hospice provides services wherever a patient needs care. This can be in a facility, nursing home or the privacy of the patient's home. Around 70% of all hospice care is done in the comfort of the home.

Myth: Hospice is for those who are close to death or actively dying.

Fact: The earlier hospice is used, the more benefit patients gets from the care. Pain and symptom management is more effective when delivered earlier in the disease process. This leads to a higher quality of life for patients with life-limiting conditions.

Myth: Hospice is only for cancer patients.

Fact: Any patient with a terminal diagnosis can benefit from hospice. Examples include HIV, kidney disease, heart disease and Alzheimer's.

Myth: A patient must sign a DNR to use hospice.

Fact: Patients do not need a Do Not Resuscitate order (DNR) to receive hospice care. While many hospice patients sign a DNR, this choice is not for everyone. Patients and their families are involved in all decisions and their wishes are honored.

Myth: Hospice is only for the dying patient.

Fact: Hospice focuses on the family as much as the patient. Our services involve a team of professionals who help with grief management, financial planning and a variety of other services that benefit the patient's loved ones before and after loss.

Myth: Patients have to give up their doctor.

Fact: Patients choosing hospice keep their own physician. The primary care physician works with our interdisciplinary team and medical director to determine the best plan of care.

Myth: Hospice is expensive.

Fact: Hospice is a Medicare benefit and most private insurance and Medicaid will also cover services. In addition, medical equipment and prescriptions related to the life-limiting condition are covered under these benefits. We admit patients regardless of ability to pay.

Myth: Hospice only helps when family members are providing care.

Fact: Hospice patients often live alone or with family members who are unable to provide care. We have the ability to coordinate community resources so that the patient can stay in the home. Hospice can also be provided in a facility or other location of the patient's choosing.

Myth: Hospice is about dying.

Fact: Hospice is about living. When pain and symptoms are managed properly, patients make the most of the time they have left. They are able to spend time with friends and family in the comfort of the home while being in control of the care they are receiving. Choosing hospice does not mean the patient is giving up hope or that death is coming soon.

Myth: All hospice agencies are the same.

Fact: While the federal regulations governing hospice programs require the same standard services, that does not mean they are all the same. Customer service, admission processes and patient response times all vary. **SouthernCare Hospice constantly strives to exceed standards when possible and our customer satisfaction rates are among the best in healthcare.**
