

June 2023

Hello Members:

Welcome to **Our Place!**

Thank you very much for your overwhelming support. We are truly amazed at the interest everyone has shown to get to this point.

We are scheduling various individuals and organizations to have a class or to have a display table to provide you with much needed information. Over the next few months we also will be scheduling additional activities. Check the activity table in the lunch area for any information added during the month.

We would like to remind you of the suggestion box in the lunch area. Help us grow by letting us know your interests. Communication is key to the success of **Our Place** so please help us stay strongly connected by sharing your ideas and feedback. Our priority will always be you!

April was Volunteer Appreciation Month but we must take this time to say **“Thank You”** to all of the volunteers who help us each and every day. We couldn't have this amazing outreach without you. We love our volunteers!

Let's make this journey hand-in-hand remembering to stop and smell the roses.

Parkinson's Support Group

"Meet and Greet"

June 14 @ 1:00

Let's get together to share information and ideas.

- What does research show about Parkinson's?
- How do other people cope with Parkinson's?
- Why did I get Parkinson's?

We will cover these topics and many others by sharing information and providing speakers that help individuals develop the best plan for moving forward with their lives.

Spouses and caregivers are encouraged to come to the meetings. Please attend and provide us with topics and information you would like to know more about.

Parkinson's is caused by a decrease in a brain chemical called dopamine. The decrease in dopamine affects body movement. The condition itself is not fatal but attention needs to be focused on quality of life issues.

Other neurological conditions mimic the same symptoms as Parkinson's. Educating yourself is a great tool for coping with changes that you may be experiencing.
